

Press Release No. 1 // Zug (CH) // 28.08.2018

**The Founding of Cryptix Holding AG in Switzerland's 'Zug'-
A Swiss full-service Blockchain service provider and research center with international
expansion plans and ambitious goals.**

The cryptix Holding AG was founded in the last quarter in the Swiss canton of Zug and acts as the parent company of cryptix AG, which was founded in 2017. The member of the 'Crypto Valley' acts as a one-stop-shop with real life implementation around the blockchain and open ledger technologies.

The Swiss canton of Zug is considered the European Silicon Valley of Blockchain and Cryptocurrencies and is therefore also the headquarter of the cryptix holding AG. "As a company, we see ourselves in the growing market of decentralized technologies as a generalist who wants to shape the blockchain scene with an ambitious, creative and technically experienced team!" Says Bernhard Koch, CEO of Cryptix, about the corporate philosophy. For this, the company not only has the right team, but also an extensive expertise. After the initial skepticism about the implementation of Blockchains in economic processes has dried up, Cryptix now wants to offer targeted Blockchain solutions for interested business partners.

Above all, the motto is to deliver everything from one source: Strategy, concept and final implementation.

First and most important is the simple integration of the technology for the long-term improvement of already existing processes. Therefore, CEO Bernhard Koch sees above all the sustainability of the technological improvements as the linchpin of his corporate concept: 'We see in this technological progress immense opportunities for a better future! That's why we want to help shape the Blockchain scene with the Cryptix group of companies in order to create a future together that brings lasting added value for our entire society. "

In order to guarantee maximum flexibility of blockchain-based solutions and the simplest possible integration into existing systems, including full legal security, the Cryptix AG is already investing in the future of technology. One project that is already being implemented are the Cryptix LABS (Cryptix LABS GmbH) in Vienna. In the coming months, a research and development site for blockchain technology will be created here. Beyond the scope of the crypto currencies, the Blockchain technology of the future will have the potential to evolve a variety of traditional business models!
